

## EFFECTS OF **CardioHealth** ON THE AGING HUMAN BODY

During middle age, the human body begins to lose its ability to synthesize CoQ10. Lack of CoQ10 has been correlated with health issues such as arrhythmias, strokes, hypertension, heart attacks, atherosclerosis, muscular dystrophy,

congestive heart failure, gum disease, obesity, stress, infections, low energy levels and AIDS. Many of these diseases can be prevented and managed successfully with CoQ10. Clinical research studies make it abundantly clear that CoQ10 is vital to good health.

Studies show that CoQ10 absorption is substantially improved when consumed with concentrated omega-3 fatty acid. Thanks to SunVim's ASE™ and EAT™ design, CardioHealth optimizes CoQ10's bioavailability. This assists the body in absorbing CardioHealth softgels more readily. Thus, taking 50 mg of CardioHealth softgels is more effective than a daily dose of 300 mg of CoQ10.

### **A Breakthrough Product for Enhanced Heart Health**

- ✓ Approved Natural Health Product by Health Canada
- ✓ Based on Molecular and Cell Biology Development
- ✓ Optimized to help Prevent Disease and Maintain Health
- ✓ Unique ASE™ and EAT™ Enhance Bioavailability

PLEASE CONSULT YOUR HEALTH CARE PRACTITIONER  
PRIOR TO USING THIS PRODUCT

## ABOUT **SunVim AND SunVim Products**

SunVim Bioscience Inc. is a Research and Development company that focuses on providing scientifically-proven, top-quality natural health products. SunVim concentrates on research in molecular and cell biology to create groundbreaking and effective formulas for our consumers. Our OptimalCare™ products assist in preventing disease and maintaining personal well being.

CardioHealth is a premium nutraceutical product from SunVim's OptimalCare™ product series. CardioHealth combines all the benefits that CoQ10, omega-3 fatty acids, and vitamin E have on the human health, while synergistically enhancing them. This is achieved by directing the nutrients within CardioHealth to simultaneously improve various body systems through increasing their fundamental energy production.

All OptimalCare™ products comply with strict Health Canada regulations, including NHPD specifications. OptimalCare™ products are manufactured in licensed Canadian GMP manufacturing facilities. Quality control and assurance are done by independent third parties.

Functional Claims Approved by

**Health Canada**

NPN80002479

- ✓ Supports the function of the heart and nourishes the vascular system.
- ✓ Promotes antioxidant effect, especially on the immune system and the neural system.
- ✓ Facilitates energy production at the cellular level.

**Molecular and Cell Biology Based Product Approved by Health Canada**

## KEY Ingredients

### Co-enzyme Q10:

A powerful, natural antioxidant that is widely recognized to:

- ✓ Prevents heart-related disease
- ✓ Fights against aging and cancer
- ✓ Boosts energy and improves overall physical performance
- ✓ Enhances immune system against allergies and chronic fatigue syndrome
- ✓ Helps prevent episodic migraines

### Vitamin E:

A potent antioxidant that:

- ✓ Protects the body from free radicals
- ✓ Prevents heart disease, cancer, dementia, liver disease, cataracts and diabetes mellitus

### Omega-3:

Is an essential fatty acid that possesses remarkable health benefits, including:

- ✓ Lowering blood pressure
- ✓ Reducing risks of cardiovascular diseases and hypertension
- ✓ Decreasing blood triglycerides and cholesterol

## SUNVIM ADVANTAGE: What's Different? INTRODUCING UNIQUE ASE™ AND EAT™

### Augmented Synergistic Effect (ASE™)

All OptimalCare™ products are backed by SunVim's clinical research, along with laboratory testing using SunVim's Augmented Synergistic Effect (ASE™) design. SunVim's ASE™ uses multiple ingredients in all OptimalCare™ products to achieve superior synergistic health benefits. Our formulas are a result of innovative scientific research.

SunVim scientists identify the effects and effectiveness of every single ingredient; compare available raw materials on the market; and, design ground-breaking formulas. OptimalCare™ products not only exceed critical ASE™ requirements in terms of equipment, formulation, ingredient sourcing, quality control and production, but also meet Health Canada regulations. All OptimalCare™ Natural Health Products are submitted to Health Canada for approval.

### The Basic ASE™ Design of SunVim Natural Health Products:

- ✓ Contains multiple ingredients
- ✓ Synergizes health benefits of all ingredients
- ✓ Is made to reach optimal efficacy with precise formulation and dosage
- ✓ Ensures superior ingredient stability through strict formulation channels and ingredient sourcing
- ✓ Follows strict Pharmaceutical Grade Codes of Manufacturing

### Enhanced Assimilation Technology (EAT™)

CardioHealth is an advanced product approved by Health Canada and manufactured using SunVim Bioscience Inc.'s award-winning EAT™ design. Important ingredients in CardioHealth include ubiquinone, omega-3 fatty acid and vitamin E. Ubiquinone is also known as co-enzyme Q10 or CoQ10. Our unique EAT™ causes CardioHealth to be absorbed by the body three times more effectively than regular tablet or powdered forms.

CardioHealth's effectiveness is guaranteed by the superior stability of ingredients that are supported by independent laboratory testing. Every component of the formula improves health, optimizes metabolism, and enhances bodily functions at cellular levels.

"ENHANCES BODILY  
FUNCTIONS AT  
CELLULAR LEVELS"

### Benefits of the EAT™ Design in SunVim Natural Health Products:

- ✓ "Less is more": higher bioavailability is achieved with fewer capsules
- ✓ Delivers nutrients in their most active form
- ✓ Promotes mutual maintenance between ingredients, resulting in healthier cardiovascular, cerebral, nervous, skeletal and immune systems
- Omega-3 fatty acid protects CoQ10 potency and bioavailability
- Vitamin E protects Omega-3 fatty acid and functions as an antioxidant
